DETAILED ACTION

Response to Arguments

1. Applicant's amendments to claims 1, 5, 6, 7, and 9 to include essential steps of the claimed method remedy the deficiencies that necessitated the 35 U.S.C. 112, 2nd rejections in Final Office Action dated 13 March 2008. Therefore, the 35 U.S.C. 112, 2nd rejections are withdrawn for independent claims 1, 5, 6, 7, and 9 as well as dependant claims 2-4, 8 and 10-13.

Allowable Subject Matter

2. Claims 1-13, 25, 26 and 28 are allowed.

3. The following is an examiner's statement of reasons for allowance: Applicant's independent claims require very specific timing sequences when performing preliminary flashing of a camera, requiring certain events to be performed on either a falling edge or rising edge of readout signals. These timing sequences are accurately described in the independent claims and one example timing sequence can be seen in Figure 6. While preliminary flashing of a camera is well known in the art of photography, applicant's invention is allowable because the prior art does not disclose the specific timing sequences required in applicant's independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
